

TRAINING PROGRAM ON PARTICIPATORY ENERGY AND ENVIRONMENTAL MANAGEMENT IN BUILDINGS: CULTIVATING A SENSE OF ENERGY AND ENVIRONMENTAL CONSERVATION IN ORGANIZATIONS

The Sustainable Activities Promotion Group of the Energy, Environment, Safety, and Occupational Health Management Center (EESH Center) at King Mongkut's University of Technology Thonburi (KMUTT) organized a specialized training program titled "Participatory Energy and Environmental Management in Buildings: Cultivating a Sense of Energy and Environmental Conservation in Organizations". The training was held on August 13, 2023, in the Conference Room on the 17th floor of the Knowledge Exchange (KX) building.

The event saw participation from the university's management team and staff, who collectively exchanged knowledge and proposed strategies to promote energy and environmental conservation. The training emphasized the significance of collective efforts in reducing energy consumption, supporting the utilization of clean energy, and participating in environmental conservation endeavors. This initiative is in line with KMUTT's overarching goal of achieving sustainable energy and environmental conservation within the

university's framework. The program aims to foster a learning society and a sustainable green community.

The activities carried out during this training session are consistent with the Sustainable Development Goals (SDGs) 2030:

- Goal 4: Ensuring inclusive and quality education for sustainable development.
- Goal 7: Ensuring access to affordable, reliable, sustainable, and modern energy for all.
- Goal 12: Promoting sustainable production and consumption patterns.
- Goal 13: Taking urgent action to combat climate change and its impacts.

This training initiative reflects KMUTT's commitment to supporting the creation of an eco-conscious student and staff community, promoting sustainable practices, and taking concrete steps towards a greener future.
